

Weekly Coal Production

Energy Information Administration
Washington, D.C

Contains Supplementary Data

Production for Week Ended:
October 20, 1984

Preface

The WCP

The *Weekly Coal Production* (WCP) provides weekly production estimates of U.S. coal by rank, as well as supplementary data which are published twice a month. Supplement 1 includes monthly statistics on U.S. coal production and aggregated annual historical data on coal supply and demand, consumption, stocks, imports, and exports. Supplement 2 contains monthly data covering electric utility coal consumption, stocks, and receipts; and coal imports and exports.

This report is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data col-

lection and dissemination responsibilities as specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other reports that may be of interest are the quarterly *Coal Distribution Report* and the *Quarterly Coal Report*.

General information about this report may be obtained from Robert Harris, Chief, Data Systems Branch (202/252-2982). For specific information regarding the preparation and contents of this publication, contact Ann Ducca (202/252-6875) or Judith Wood (202/252-5228).

Highlights

Production of bituminous coal and lignite in the week ended October 20, 1984, as estimated by the Energy Information Administration, was 14,418,000 short tons. This was a decrease of 478,000 short tons or 3.2 percent from production in the previous week. Production in the corresponding week of 1983 was 17,309,000 short tons. Bituminous coal and lignite production from January 1 through October 20, 1984 totaled 738,162,000 short tons, 17.8 percent above production in the same period of 1983.

Production of Pennsylvania anthracite in the week ended October 20, 1984, as estimated by the Energy Information Administration, was 83,000 short tons, 3,000 short tons or 3.5 percent less than production in the previous week. Production in the corresponding week of 1983 was 101,000 short tons. Anthracite production from January 1 through October 20, 1984 totaled 3,214,000 short tons, 0.3 percent above production in the same period in 1983.
